

# Physics Summer School 2008-

*The Role of Physics Research in Delivering Excellence*

**A human sundial at last year's Physics Summer School**

This year's Physics Summer School takes place at Glasgow University from June 23rd to June 27th. Featuring lectures, lab work and visits, the event looks at ways that physics research can enhance the work that takes place in the classroom. The Summer School has always proved to be highly popular with physics teachers. It is therefore wise to book early.
