

Update of chemistry risk assessments

Any chemistry teacher will no doubt be aware that all of the many chemistry activities listed on our website come with their own model risk assessment that you can customise for your own use.

Over the past few weeks all of these have been reviewed, updated to take account of any changes in procedure and classification since they were last reviewed and converted to an updated format.

All the links on the pages for the chemistry activities have been updated to point to the revised versions and anyone who wishes to download all of them in a single zip file can do so here:
