

Get set for Maths Week Scotland 2021!

Maths Week Scotland SSERC Meet SAiS Early/First Level Maths

Get ready for Maths Week Scotland with this live, interactive professional learning event in collaboration with STEM Ambassadors in Scotland (SAiS).

Resources are supplied, at no cost to the setting, to enable up to 10 practitioners to take part in the twilight event.

Take part in engaging activities during this twilight session, based around the theme of "Our World". Find out how the range of resources provided can support numeracy and mathematics at Early and First Level.

Activities will support learning through play and link to real life problem solving using simple resources. There will be an opportunity to interact with STEM Ambassadors who will explain how they use mathematics and numeracy skills in their roles. This SSERC Meet is designed to inspire you and your setting to get set for Maths Week Scotland 2021!

This course will be delivered via Microsoft Teams.

**Session 1:
Monday 13 September 2021**
