

Spotlight on STEM Ambassadors

STEM Ambassadors are employees and students working in STEM focused roles who volunteer their time to help engage and inspire the next generation of learners.

Whether it's running a workshop, judging a STEM competition, or giving a careers presentation or Q&A, they are there to help bring STEM to life in the classroom.

We have thousands of ambassadors available throughout Scotland, specialising in all areas of STEM.

To give you an idea of just some of the people you and your learners could engage with we regularly spotlight ambassadors on our [website](#), highlighting their day-to-day jobs and the paths they took to a career in STEM.

Not only do these articles give an idea of the ambassadors that we have on board, they can be used as a tool to discuss career options with learners.

Our latest spotlight Emily Southworth is a PhD Student at the Edinburgh University Institute of Genetics and Cancer.

Arrange a STEM Ambassador visit online or face-to-face

If you would like a STEM Ambassador to be involved in your setting here is how it works.

Login or register on the STEM database at www.stem.org.uk and add an activity giving as much detail as possible about what you would like the ambassadors to do and we will do the rest.

When you add an activity ambassadors can get in touch to register their interest, we also promote the activities through our communications with our volunteers to help you get the right person for your request.

More information on requesting ambassadors can be found in our [Teachers Guide to STEM Ambassadors](#).
